Police arrangements around the Maharani's College General Hostel etc.

Police has been posted from the Mysore Bank Circle to the Maharani College Circle with the result that it is very difficult for the members to go to their rooms in the General Hostel. This is the case since yesterday. I tried to contact the Commissioner of Police but he was not avilable. I tried to contact the Speaker but he was also not available. This difficulty is experienced not only by the members of the legislature residing in the General Hostel but also the students residing in the Medical College Hostel. Neither the Speaker nor the Deputy Speaker has visited the place.

Calling Attention to a matter of urgent Public Importance

re. Purchase of Electric Motors, etc., by ryots through the Banks

SRI B. GANGANNA (Kallambella).—Sir, I call the attention of the Chief Minister to the matter of inconveniences caused to the ryots who go in for loans to purchase electric motor sets on loan through the Bank of Mysore all over the State.

SRI D. PARAMESWARAPPA (Deputy Minister for Major Irrigation and Electricity).—The loans for purchase of pumpsets by the intending consumers are at present being given by the banks. In order to ensure that the loans are not given to the consumers to whom it will not be possible for the Electricity Board to give power supply on account of the wells being located very far away from the existing distribution lines and consequently being uneconomical, the Board has stipulated that the intending consumers should first obtain a feasibility certificate from the local officer of the Mysore State Electricity Board. On receipt of an application by the consumer, the Electricity Board prepares an estimate and determines whether the line can be extended within the ceiling limit of Rs. 1,250 per H. P. fixed by the Board. If a large number of consumers come up in an area, group estimates are prepared keeping the above ceiling limit in view. If it is found that it is feasible to extend the distribution line and give power supply to consumer, a feasibility certificate is given to the consumer indicating that the power supply will be given within six months of the date of his submission of completion report for having installed the pump and completed the wiring etc. If the applicant is one among the several consumers for whom a group estimate is prepared, the feasibility certificate is issued with the condition that power supply will be given to him within six months subject to the condition that at least 50 per cent of the applicants for whom the estimate has been prepared, instal pumpsets, complete wiring and submit completion reports to the Board. On receipt of feasibility certificate, the consumer has to approach the Bank and obtain the loan, purchase the pumpset and instal the same and submit the completion report to the Board.

While it is the intention of the Board to service the pumpsets of the consumers within a reasonable time after the receipt of the completion report, there are so many uncertain factors such as, non-availability of essential materials and as much, connections to the consumer are given in the order of priority on receipt of completion reports from consumers for whom power supply has already been sanctioned. It is also made clear by the Board that the power supply sanctioned by it is
